Discussions

Diberikan sebuah array acak *arr* yang berisi nilai permutasi $[0, 1, \dots, n-1]$.

Saudara yang baik adalah 3 pasang nilai berbeda yang berada dalam urutan meningkat. Sedemikian sehingga $arr[x] < arr[y] < arr[z]$ dengan $0 \leq x, y, z \leq n-1$.

Input Format

arr, sebuah array acak berisi permutasi $n-1$

Constraints

$3 \leq n \leq 10^5$

Output Format

baris pertama, N jumlah 3 bersaudara yang memenuhi syarat baris selanjutnya, kombinasi array pasangan sebanyak N

Sample Input 0

```
0 3 2 1 4
```

Sample Output 0

```
3
[0, 1, 4]
[0, 2, 4]
[0, 3, 4]
```

Explanation 0

$[0, 1, 4]$ salahsatu pasangan yang memenuhi syarat $[0, 3, 2]$ bukan pasangan yang memenuhi syarat karena $0 < 3 > 2$

Sample Input 1

```
5 3 2 1 4 0
```

Sample Output 1

```
0
```
